Re: Buckeye Cablevision, Inc. ("Buckeye CableSystem") / Compliance Letter, Nov. 28, 2005, WC Docket No. 05-196

Dear Ms. Dortch:

We submit this Compliance Letter on behalf of Buckeye CableSystem. Due to an administrative oversight, the company failed to submit this Compliance Letter on November 28, 2005. Accordingly, we are filing the attached Motion requesting that the Commission accept this late-filed Compliance Letter immediately following the filing of this Compliance Letter.

As an initial matter, Buckeye CableSystem applauds the Commission's efforts to ensure the safety of VoIP users, and is proud to report that it is in full compliance with the Commission's E911 rules. We detail Buckeye CableSystem's compliance below.

Percentage of subscribers with 911 in compliance with the Commission's Rules. 100 percent.

Declaration that 911 calls are being routed properly. Buckeye CableSystem is correctly routing calls to the appropriate authorities using selective routers, the trunk lines between the Selective Router and the Public Safety Answering Points (PSAP), and other necessary elements of the wireline 911 network.

Number of Selective Routers. Buckeye CableSystem is currently interconnected to SBC's Perrysburg, OH Selective Router and Verizon's Bowling Green, OH Selective Router. In turn, these Selective Routers connect Buckeye CableSystem to all the PSAPs in Lucas, Wood, Ottawa, Erie, and Hancock counties in Ohio.

Declaration that 911 callers' ANIs and registered location information is transmitted to all answering points. Buckeye CableSystem has tested its network with the Selective Routers and the PSAPs in its service area, and these answering points have all properly received and processed Buckeye CableSystem's ANI and registered location information. Further, Buckeye CableSystem has not been notified of any problems with the transmission of this information. Accordingly, Buckeye CableSystem believes that 100 percent of the answering points in its service area are capable of receiving and processing its ANI and registered location information.

Description of actions taken to ascertain subscriber's current registered location. Buckeye CableSystem has obtained registered location information from 100 percent of its customers.

Buckeye CableSystem's VoIP service is fixed – tests done by Buckeye CableSystem's technicians show that the service will not function if the modem is moved to another address. Accordingly, Buckeye CableSystem's customers' registered location information cannot change.

Further, Buckeye CableSystem has provided every customer with warning stickers detailing the limitations on its E911 services, including that the customer's VoIP and E911 services will not function properly if the modem is moved.

On an ongoing basis, Buckeye CableSystem technicians warn every new customer of the limitations on the E911 services, show every new customer the warning sticker, and require every new customer to sign an acknowledgment that the customer has read and understood the limitations on Buckeye CableSystem's E911 services.

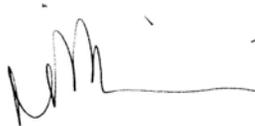

Methods to update registered location. Because Buckeye CableSystem's VoIP services do not function if the modem is moved by a customer, there is no need for customers to update their registered location. If a Buckeye CableSystem's customer does want to move, it can call Buckeye CableSystem using its VoIP services, and Buckeye CableSystem will arrange for a technician to install the VoIP services at a new location.

Solutions for nomadic VoIP services: Buckeye CableSystems offers no nomadic VoIP services. As explained above, Buckeye CableSystem's technicians have determined that the service will not function if the modem is moved to a new location. Accordingly, Buckeye CableSystem has no need for any automatic detection mechanisms to identify subscribers who move VoIP equipment.

Commitment not to accept new VoIP subscribers in areas where Buckeye CableSystem cannot provide 911 services: Buckeye CableSystem provides 911 services in all areas in which it offers VoIP service, so this is not an issue.

If you have any further questions, please contact me.

Regards,

Nicole E. Paolini-Subramanya
