COMMENTS OF HARRIS CORPORATION

Harris Corporation (“Harris”) respectfully submits these comments in reference to the above-captioned proceeding. The above-captioned application (the “Application”) seeks the Commission’s consent to transfer control to Intelsat Holdings, Ltd. (“Intelsat”) of licenses held by two subsidiaries of PanAmSat Holding Corporation (“PanAmSat”).¹ Harris hereby comments in support of the Application.

I. Introduction and Summary

Harris is an international communications equipment company with four operating divisions that offer products and services in the microwave, broadcast, secure tactical radio, and government communications market. As the world's leading broadcast transmission equipment supplier, Harris' Broadcast Communication Division is the leader in digital solutions for television and radio broadcasting and has been at the forefront of the transition to digital television, supplying the majority of the digital television transmitters and encoders in the United States.

Harris' Microwave Communications Division is the largest supplier of microwave systems in North America and one of the largest suppliers of fixed wireless solutions worldwide. It offers a broad range of wireless products, systems and services to cellular, PCS, private, and other public network operators. The products include both point-to-point and point-to-multipoint radio systems ranging from 2 to 38 GHz and are used for network deployments, network extensions, and capacity upgrades.

The Harris customer base includes, both licensed and unlicensed service providers, serving a variety of markets including 802.11, 802.15, 802.16, analog and digital television, and software-defined radio. Our customers include cellular service providers, wireless ISPs, broadcasters, and agencies engaged in public safety. Harris is in the unique position of understanding the issues presented in the NPRM from the perspectives of several key stakeholders: the broadcasting industry, the public safety industry, and the wireless industry.

II. Harris Supports Grant of the Application

Harris supports a grant of the Application. The satellite business is intensely competitive. Satellite operators must compete with domestic and regional satellite systems, global satellite systems, and wired and unwired terrestrial systems. These competitors include some of the largest corporations in the world. A merger between PanAmSat and Intelsat will generate tremendous efficiencies, making for a stronger company that is better positioned to operate in this competitive environment.

In view of the foregoing, Harris urges the Commission to grant the Application.

Respectfully submitted,

HARRIS CORPORATION
