

ER  
ERRATUM

We respectfully request that the FCC remove a table referenced in Petition RM-11305, entitled Proposed Changes, Section 97.301. It appears starting on page "v" and extends through "viii," inclusive.

It contains an error brought to our attention during the public vetting process. Our intention remains to ask that you grant us the flexibility in the use of all modes on all frequencies where applicable, and in line with, the IARU Bandplan Guidelines for Region 2.

We refer to our support for this IARU plan in page iii, paragraph four, and remain convinced this provides a workable band plan within which we can accomplish our stated goals without the future need to revisit the rulemaking process.

Submitted for the public record,

-S-
