

Dear FCC,I would like the ability to record HDTV from my satellite service to my Windows Media Center PC and my TIVO. This means that Cablecard needs to be your number one priority. Also you need to quit pushing the HDTV deadline back. I bought a TV 6 months before the first HDTV deadline was supposed to take effect and then I learn that the deadline has been moved. By the time there is more than a handfull of HDTV shows available for me to record my TV will need to be upgraded.
