

PEG channels help realize the free speech goals of the first admendment. It is vital to a healthy democracy to have non commercial independent media and local media as part of the television landscape. Please support the ACM's position and keep franchise's under local control. Encourage competition for TV, internet, and phone services and encourage A la carte programming or a bottom cable tier of "civic package" with PEG, PBS, and C-span type channels.

Thank you,
