

Filing in opposition to 11306

To Whom it may concern;

Let it be known that I, KA1IIC Vincent Werber Of Pittston Maine, stand against any type of bandwidth restriction in reference to Amateur Radio practice

Any such restriction would cause to bare an undue hardship for experimentation and users of certain vintage radio equipment such as myself. Not only would this close the door for working with vintage equipment but would also make impossible experimentation of any newer modes in the future such as digital.

I respectfully say NO to any such restrictions!

Thank you for your consideration in this matter.

Vincent G. Werber
