Re: Application for Relief from Prohibition on Copying -- MB Docket No. 05-192

Dear Ms. Dortch:

The Media Bureau has requested a list of the minimum computer requirements that would be needed by the outside consultants of DIRECTV, Inc. ("DIRECTV") in the event they are forced to conduct their review and analyses of electronic data submitted by Comcast Corporation and Time Warner, Inc. (the "Submitting Parties") in the offices of the Submitting Parties' outside counsel. Although these requirements are set forth below, DIRECTV again stresses that such a requirement will impose substantial burdens on its outside counsel and experts and, given the constraints inherent in such a review, promises less robust public participation and the creation of a far less comprehensive public record.¹ The minimum requirements are as follows:

OS: Microsoft Windows XP with Service Pack 1 or later

Software: PC SAS 9.1 or later with all components installed including PC SAS Enhanced Editor

Processor: Minimum Pentium 4 (Not Celeron) 1.8GHz or higher

Memory: Minimum 1GB RAM

Disk Space: 80 GB

Monitor: SVGA (resolution of 800 x 600 or higher)

Printer: Laser printer to use for both workstations that prints at 20 PPM or faster

Private Network Sharing only between the two computers: 1 Gigabit Ethernet Controller

If unable to provide networking sharing between two computers: PC should have USB 2.0 built-in controller (or USB 2.0 controller with powered bus) as well as an external USB 2.0 Hard Drive with ample space for sharing of data.

If you have any questions, please do not hesitate to contact undersigned counsel.

Respectfully Submitted,

/s/
