

Please keep public access television available for the public. I am on an all-volunteer team that produces shows for Channel 56 public access television in Pasadena California. Our show, Pasadena MoveOn Looks at the Issues, is able to bring in knowledgeable guests on a variety of topics. I know very little about television, but I do know it is the one medium many people consume. It is a way to get information out to a wide audience. Please continue public access television so that television is not controlled by commercial interests.

Thank you,

Stevi Carroll
