

Unresponsive Government regarding (Citizens Community Television/Public Access TV)

Democracy fails for the citizens of the United States of America. It has come to my attention that for some reason our elected officials in the United States Government office have allowed Cable and Phone companies to change the Federal laws protecting Americans rights to Citizens Community Television/Free Speech TV/Public Access TV.

Public Access TV allows for Freedom of Speech Television for all the citizens of the United States of America. Allowing anyone in the United States of America whom wishes to express their concerns or put together a TV show without Government interference or corporate regulations against free speech, an opportunity to make their voice be heard regardless of financial means!

We cannot have a equal and fair Democratic Society when we have all our news censored by the Government, Banks and Giant Corporations whom control our Democratic Government and Mass Media! Corruption, Banks, and Corporate Giants have taken over this country and our just and fair Democratic Government! If you have money and power in this country you can break the law! Cable and Phone corporate giants have a Monopoly in this country and have failed to honor their franchise agreements with the citizens of America. They have come in, taken exclusive service of our cable and high speed internet, made promises by law to this country and have been braking that law! Cable and phone companies are taking our money every month, now they want to take away our rights to Public Access Television!

Our Government should stand up united for Americans rights, for Public access television, against Cable and Phone corporate giants! Keep Freedom of Speech Television alive for our countries community voice and our future generations. How would anyone really know what is really going on in this world without shows like Democracy now! I want the real news not censored and manipulated, controlled news by giant corporations and government interests!

Cable and phone companies have a duty to provide for our Freedom of speech! These corporations make billions of dollars off community property and in return it's their civil responsibility to contribute back into Americas communities, it's their rent, they owe the American people this support and everyone knows these corporate giants take our hard earned money every month, to lined their pockets then send their lobbyists to the Federal level to have the laws changed in their favor and take away the citizens of America, Freedom of Speech/Public Access Television rights. As a result, Freedom of Speech television stations are closing down throughout America. Basic Freedom of Speech is under attack in America. I formally request this Government mandates a federal law that provides for our Freedom of Speech Television/Public Access Television rights and is a condition on all future franchise cable agreements in this country.

Once our community voice is gone it's gone forever and a just fair Democracy fails for all the people of America. The Banks, Corporate giants, and our corrupt Government prevail, justice on a mass scale fails the American people. It starts now, in our great country the United States of America to stand up for our right to be heard!

It seems that our Federal Government has forgotten its main job, that is to stand true for the rights of the American people, in a sense we the people are your supervisors! Lets all not forget the fundamental reasons why you became a Government representative of the people!

I formally request that my federal Government put forth a federal law in support of, stand strong and united for the rights of Freedom of Speech/Public Access Television, for the American people whom are directly affected and are about to lose their Free Speech/Public Access Television Rights, in America.

Have cable and phone companies honor their franchise agreements and make support of Free Speech/Public Access TV a condition of any new cable, franchise agreement, in the United States of America . I believe Freedom of Speech TV should be a high priority for the Government, Freedom of Speech Television is a basic and fundamental right, it gives all people the ability to be equal and be heard.

Thank you
