

I am an avid supporter of local press thru my local cable station . I fund yearly. I find the more local programs helpful with information regarding the community and county that i have lived in for 13 yrs now thru both the social and local goverment programing that is presented which is what decmocracy is all about, exchanging and opening the medium to local organizations of diverse backgrounds and agendas who wouldn't have access thru the larger broadcast companies. We as a community need this venue and access and is what i feel makes us a democratic society.
