

Reply Comments OPPOSING Petition 05-356 to Relax Part 15 Rules

I agree with the comments of IEEE 802.18, the Radio Regulatory Technical Advisory Group, opposing the petition of Octatron, Inc. and Chang Industry, Inc. There is no regulatory or public benefit to approving the waiver. Operation within the current Part 15 regulation for the 902-928 MHz band is technically feasible for the application of Octatron and Chang without waiver (although they would have to account for regulatory constraints in the design, which they have apparently chosen not do so far.)

I also agree with the comments of ARRL, the National Association for Amateur Radio, regarding adverse impact on other services in the 902-928 MHz band.
