

As far as I am concerned for your rejection to support for those in need of long distance. One is exaggeration of time to translate through VCO or tty will cost us more than hearing normal cost. Hearing speak faster than our speed of communication over VCO and tty. It is totally discrimination of threat us. That is why I am no longer rely on tty cuz it is so highly costly due to my disability check and hearing always have freedom to speak at their own pace way worst than our pace is exaggeration of time. That is disgusting of how thoughtful of you compared to hearing and the hearing impaired. I also afraid to buy Cap Tel cuz of long distance charge to high. I am deaf myself and also have the ability to speak. I no longer speak on the phone cuz of long distance is so highly cost to me. I rely on videophone or relay over the internet now. I am more satisfied cuz of communication is not being barrier and need discuss deep of understanding what was the discussion is about or else I would never being educated from business or others to discussion whatever it means. However, I feel that you are totally discrimination our language and exaggeration that cost us a lot of money to pay. I am not interesting in telephone with vco and etc.. it is too much and i m not able to be educated over the phone with deep discussion. Sad about you guys not support us with our disabilities rights.
