

I have been an active member of a local public access channel for over 10 years now. I truly value the presence of a community based channel for people to express themselves. I have been an active member of the public access board for over 5 years also, becoming more and more involved and educated about the importance of this non-profit organization. I feel that it is an important part of the fabric of this good country that we allow the citizens an opportunity to voice themselves in a free and responsible way. It would be a major disappointment that anything would interfere in such an institutions future of expression to all irregardless of political inclinations, economic status, etc. Its of importance to me but I know that there are many who share a common fear that we will loose our PEG channels and not be able to communicate with each other on a local or national level. I hope that the choice that is made is in consideration of how important PEG channels are for All of our rights and benefits to living in this country and the world. thank you,...Jack Fuller
