

REGARDING ISSUE OF deregulation and phone companies etc trying to get rid of local municipality and - if I understand issue correctly - cable companies contracts to force there to be public access cable stations and channels?

I guess making all these huge companies pay a gratuity on public bandwidth and spectrum is reasonable.

For parties over such and such a 15% gratuity will be added.

At the very least, it will give the "big boys" one more place to monitor and watch to copy "the next big idea" from...ripping off some small guy.

LEt's HOPE not.
