It's bad enough that the cable industry is allowed to be a monopoly in each state with no competition whatsoever. Now I hear cellphone use in flight might be a reality soon. I don't want to hear some moron talking throughtout a flight. Hopefully somebody uses their head in the FCC soon.

Dear Sirs,

I am writing to ask you to continue the current ban of cell phone use on airplanes. We are currently experiencing an extreme loss of civility in our country and cell phones are part of the problem. Air travel is painful enough without having to listen to one or more cell phone conversations while you're a captive audience. Please do not allow use of cell phone on airplanes. Thank you for your consideration.

To: KJMWEB
Subject: Comments to the Chairman

RECEIVED

APR - 3 2006

Federal Communications Commission
Office of the Secretary

Joanne D. Lind (rjlind_01002@yahoo.com) writes:

Dear Chairman Martin,

I have recently learned of the plan by the FCC and FAA along with the cellular phone companies and airlines to approve the use of cell phones by passengers during air travel. I AM ADAMANTLY OPPOSED to allowing cell phone use during an airplane's flight for both passenger sanity and safety reasons. My principal concerns include:

- Cell phones can enable terrorists to communicate for attack coordination and could potentially be used to detonate explosives
- Potential for flight instrumentation interference by cell phone transmissions causing navigation issues
- Likelihood of violent conflicts between passengers

In my opinion the passenger flight safety issues significantly outweigh the convenience aspects of this proposal.

Since you are the Chairman of the FCC, I STRONGLY URGE that you act to stop this proposal and maintain the ban on passenger in-flight use of cell phones.

Sincerely,
Jaonne D. Lind

Dear Sir

I have read articles in the Wall Street Journal and NY Times regarding possible use of cellphones in the airline cabins....please, NO NO NO.

Its bad enough having people shouting to their companions during the flight but to have people talking for a 10 hour flight would be unbearable.

It would not just be businessmen and women but parents, kids with nothing better to do, etc. Until cellphones can be made silent, lets try to keep the friendly skies quiet.

I and my husband travel over 100,000 miles every year. The planes are crowded, and occasionally passengers a bit grumpy..fights over cellphone usage would just add to the general stress levels many people carry on with their baggage.

Thank you

Mary Mackiernan M.D.

I strongly oppose the proposal to allow cell phones to be used on airplanes. There is a clear danger of their interfering with the aircraft navigation, as detailed by engineers in the following article in the March 2006 issue of IEEE Spectrum:

"Unsafe at Any Airspeed? Cellphones and Other Electronics Are More of a Risk Than You Think."

I urge you to defeat this movement by a small percentage of the American population. All the polls I've seen on this subject show Americans overwhelmingly opposed to the use of cellphones and other electronics on a flying aircraft.

Sincerely,

Costas Varmazis

APR - 3 2006

Federal Communications Commission
Office of the Secretary

Good Morning Chairman Martin,

I am writing to you today to express my dissatisfaction with the Commission's recent decision to allow Clear Channel to broadcast a digital signal out of the Albany, New York area using Channel 7, which began on December 22, 2005. This decision has caused me and 45,000 other people to permanently lose their analog Channel 7 video reception from New York City. I believe this decision was a major blunder on the Commission's part and I respectfully request that it be readdressed in light of the fact that it has caused service disruptions for a considerably large amount of viewing public. Thank you in advance for your cooperation in this matter.

Respectfully yours,

Vincent A. Rossi

I am wondering if all your phones are checked for FCC regulations prior to selling. I have had a cell phone for about ten years now and this is the only one I have ever had the following problems with. Whenever I am in a room with my new Sony Ericsson Z520a cell phone and a computer, Mycomputer screen squiggles, my heart races and feels fast and bubbly in my chest and I get small painful little shooting pains in my head. I do not have these problems outside or in my car. Is something wrong with my service or your phone or possibly it is omitting to much of something it should not be ?? What should I do ?and have my phone tested for something ??

Thanks, RUTH Lewandowski

Subject: Cell Phones on Planes

RECEIVED

APR - 3 2006

Chairman and Commissioners,

Federal Communications Commission
Office of the Secretary

There is talk that the FCC is going to allow cell phones to be used during flight. I am writing to register my very strong opposition to this possibility. On a plane there is often no option to change one's seat and there are many times when you are not permitted to move about the cabin. People talking on cell phones tend to talk much louder than when they are simply conversing with the person next to them. The thought of listening to someone conduct business, discuss personal issues or teenagers just being teenagers for hours on end when I am trying to read or sleep is very disturbing and distressing. I fly several times a month and this is an issue of great concern.

Will there be a formal way for the public to comment on this proposal?

Thank your for your consideration.

Shelley Fishman
