

Cox Communications has monopolized Fairfax County Virginia for Cable providers. Paying way too much for basic cable and a terrible service as well.

Allow competition from Comcast and/or other cable providers. Allow us to choose the channels we want... Anything. Pretty ridiculous. The argument that satellite is keeping competition low is a terrible and entirely false argument. There are many apartment complexes that don't allow satellites on the premises. If you don't pay for Cox Communications cable, internet expenses increase, same with phone. The cheapest way to get things done is to buy their package but cable is still extraordinarily high with prices.

**WE NEED COMPETITION IN FAIRFAX, VA**

Help the consumer. Cable companies across the nation have taken advantage of this.
