

The Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear The Federal Communications Commission,

While I support taxes to ensure universal phone service, we must be careful not to make prepaid phone service too expensive. Many of the poorest of us use this service for basic mobile phone needs. I am using our old Nokia Tracfone for emergencies when I take my 3 young children out on the trails in Iowa. Also when both I and my wife are out driving. Also when I am coaching soccer. I would not use this phone if it cost me much more.

Thanks for your time reading this.
