Re: COMPLIANCE LETTER
WC Doc. No. 05-196, 04-36

Dear Ms. Dortch:

Shrewsbury Electric and Cable Operations ("SELCO") hereby submits this "Compliance Letter" Pursuant to the FCC's Voice Over Internet Protocol ("VoIP") 911 Order¹ and the Enforcement Bureau's November 7, 2005 Public Notice concerning the compliance letter requirements for interconnected VoIP service providers².

SELCO plans to offer "Interconnected VoIP Service," as defined in the Commission's VoIP 911 Order and Commission Rule 9.5, via its cable television system in the very near future. SELCO is filing this Compliance Letter in anticipation of its service launch.

- **911 Solution.**

SELCO will provide a facilities-based, fixed location interconnected VoIP service using geographically relevant telephone numbers based on existing rate centers. The service will be offered solely to residential subscribers within SELCO's service area in Shrewsbury, MA. SELCO will provide 100% of its VoIP customers with 911 service in compliance with the rules established in the Commission's VoIP 911 Order.

- **911 Routing Information/Connectivity to Wireline E911 Network**

SELCO will interconnect directly with the Wireline E911 network through its partnership with a competitive local exchange carrier ("CLEC") affiliate. Under that arrangement, SELCO will transmit all 911 calls to the appropriate PSAP.

¹ *In Re IP-Enabled Services, E911 Requirements for IP-Enabled Service Providers*, First Report and Order and Notice of Proposed Rulemaking, 20 FCC Rcd 10245 (rel. June 3, 2005).

² See Enforcement Bureau Outlines Requirements of November 28, 2005 Interconnected Voice Over Internet Protocol 911 Compliance Letters, Public Notice, DA 05-2945 (rel. Nov. 7, 2005).

- **Transmission of ANI and Registered Location Information**

SELCO will transmit, via the Wireline E911 network, the 911 caller's ANI and Registered Location to the answering point that serves the town of Shrewsbury. The Shrewsbury answering point is capable of receiving and processing the ANI and Registered Location information. Thus, 100 % of SELCO's VoIP customers will be able to transmit ANI and Registered Location information to an answering point that is capable of receiving and processing this information.

- **911 Coverage**

SELCO will have the capability for full compliance with the VoIP 911 Order in 100% of its service area when its service is launched.

- **Obtaining Initial Registered Location Information**

As previously mentioned, SELCO's "Interconnected VoIP Service" is a planned offering. Therefore SELCO has no existing VoIP service subscribers. Once SELCO commences offering interconnected VoIP services, it will obtain the initial Registered Location information from 100% of its VoIP customers when the customer subscribes to the VoIP service and prior to initiation of service.

- **Obtaining Updated Registered Location Information**

SELCO will offer interconnected VoIP service only on a fixed location basis. Service initiation will require an installation visit by a SELCO technician. SELCO's customers will be required to schedule a technician visit whenever they wish to move their service to a new address within SELCO's service area. Customers that move outside of the SELCO service area will not have the option of using SELCO services.

SELCO's VoIP customers will be given the following options to schedule a technician visit to relocate their service and update their Registered Location information:

- i. Visit SELCO's customer service office location.
- ii. Call SELCO's customer service department.

- **Technical Solutions for Nomadic Subscribers**

As stated above, SELCO has no plans to offer nomadic interconnected VoIP services.

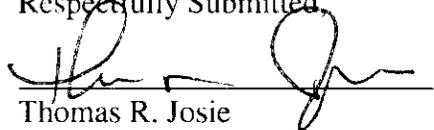

Marlene H. Dortch,

April 24, 2006

In summary, all 911 calls made by Shrewsbury Electric and Cable Operations' interconnected VoIP Service subscribers, will:

- route to the appropriate public service answering point, and
- contain the caller's ANI and Registered Location.

Please feel free to contact the undersigned if you have any questions or need additional information.

Respectfully Submitted,

Thomas R. Josie
