

I am strongly opposed to debt collectors being allowed to call cell phones. I have never been in a position where a debt collector has needed to call me or any of my family members. I have had them harass me when looking for people who had my land line phone #'s before. Since I have the privilege of paying high prices to receive phone calls on my cell phones I find it an outrage that a debt collector could mistake me for a debtor and constantly harass me on my cell phone @ my EXPENSE! If the FCC allows this I will be out campaigning in upcoming elections for candidates who are against this policy and put forth the required effort and pressure on the FCC to prevent this.
