**Re: WT Docket No. 01-309  
HAC Digital Wireless Telephones**

**Fifth Semi-Annual Report**

Dear Ms. Dortch:

The Filer, Texas RSA 15B2 Limited Partnership d/b/a Five Star Wireless, is the licensee of Cellular Radiotelephone Service Station KNKN691. This report is submitted pursuant to the requirements of Paragraph Nos. 89 – 91 of the Commission's Report and Order (WT Docket No. 01-309), FCC 03-168, released August 14, 2003 ("R&O").

By way of background information, the Filer is a small, Tier III Commercial Mobile Radio Service licensee, as defined in the Commission's E-911 Order to Stay, FCC 02-210, released July 26, 2002. The Filer provides Frequency Block B cellular service to the B2 Segment of the Texas 15 - Concho RSA. The digital portion of the Filer's wireless system employs the Time Division Multiple Access ("TDMA") and the Code Division Multiple Access ("CDMA") air interfaces. The CDMA facilities are replacement facilities for the TDMA facilities, and the Filer is in the process of transferring its customers to the CDMA facilities. As a result, there are no new customer activations on the TDMA facilities, and all handsets currently being activated are a mix of CDMA-only and dual-mode CDMA/analog telephones.

The Filer currently markets approximately seventeen (17) digital wireless telephone models. Of these, the Motorola Models V710, V262, and V265 meet a U3 (or M3) rating under ANSI Standard C63.19. Upon information and belief, none of these units meets a U3T (or M3T) rating under ANSI Standard C63.19.

To achieve compliance with the Hearing Aid Compatibility ("HAC") requirements of the R&O, the Filer has been and remains literally at the mercy of the handset manufacturers to develop and market HAC-compliant digital wireless handsets. As a small, Tier III wireless carrier, the Filer has no influence over the product development and distribution decisions of wireless handset manufacturers; and, accordingly, must rely on the manufacturers to develop HAC-compliant digital wireless handsets for use on the Filer's system.

Given the foregoing, the information requested by the Commission is identified as follows:

**Item 1 -- Digital Wireless Phones Tested:** The Filer has not tested any digital wireless telephones for HAC compliance. All testing has been and will be done by the handset manufacturers.

**Item 2 -- Laboratory Used:** None. See Response to Item 1.

**Item 3 -- Test Results For Each Phone Tested:** Not applicable. See Response to Item 1.

**Item 4 -- Identification Of Compliant Phone Models and Ratings According To ANSI C63.19:** As reflected on page 1 of this report, three of the digital wireless handsets marketed by the Filer have a U3 (or M3) rating under ANSI Standard C63.19. Upon information and belief, none of the handsets marketed by the Filer meets a U3T (or M3T) rating under ANSI Standard C63.19.

**Item 5 -- Report On The Status Of Product Labeling:** None. Product labeling for the three U3 rated handset models is performed by the handset manufacturer. It is anticipated that product labeling for all future HAC-compliant models placed in service on the Filer's system will be handled by the handset manufacturers.

**Item 6 -- Report On Outreach Efforts:** The Filer has developed a hearing aid compatibility information sheet to assist hearing impaired customers in selecting current model phones and accessories most suitable to their needs. Current and prospective hearing-impaired customers are allowed to test the phones in the store prior to purchase.

**Item 7 -- Information Related To Retail Availability of Compliant Phones:** See Response to Item 4.

**Item 8 -- Information Related To Incorporating Hearing Aid Compatibility Features Into Newer Models Of Digital Wireless Phones:** The incorporation of HAC features into newer models of digital wireless telephones will be accomplished by the handset manufacturers.

**Item 9 -- Any Activities Related To ANSI C63.19 Or Other Standards Work Intended To Promote Compliance With The Requirements Of The Commission's Report and Order:** None.

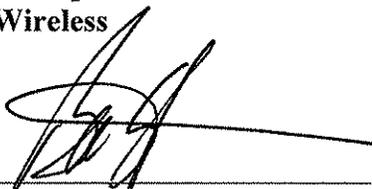

**Item 10 -- Total Numbers Of Compliant And Non-Compliant Phone Models Offered As Of The Date Of This Report:** See page 1 of this report.

**Item 11 -- Any Ongoing Efforts For Interoperability Testing With Hearing Aid Devices:** Interoperability testing will be performed by the handset manufacturers.

Very truly yours,

**Texas RSA 15B2 Limited  
Partnership d/b/a Five  
Star Wireless**

Dated: 5/16/06
