

I have read something about videophone services/VRS fundings may be cut down from the government. You cannot do that to us, the deaf population in America. Videophones are one of the greatest equipments designed specifically for the deaf people. They are better and easier to express your emotions over the TTY/TDDs. It is so easier to sign to your loved ones and friends over VPs than outdated TTY/TDDs. How do you feel if they cut down your cellphones and emails service because of raising costs?
