

I would like to lend my support to the efforts of the Miller Media Group in Taylorville, IL, which has petitioned the Federal Communications Commission to allow locally originated programming on FM translators.

Allowing locally originated programming on FM translators, continues the FCC's commitment to providing local radio service, and is in step with its 1982 decision allowing locally originated programming on TV translators.

Our community will benefit from the additional coverage of live broadcasts of such things as city council meetings, additional high school sports play-by-play broadcasts, and different musical genres, on our local FM translator.

We would encourage the Commission to allow locally originated programming on FM translators, so that our community may benefit from additional locally produced program choices.
