

I would like to express my strong desire for the FCC to require digital multicast must carry. Our station is broadcasting Telemundo on digital channel 26-2 and a 24/7 local weather channel on 26-3, in addition to ABC-HD on 26-1. Some cable companies have agreed to carry Telemundo and 25 Weather Now, but many have refused to carry these two channels. Both Echostar and Direct TV have local to local service in the Waco market, but only Echostar has agreed to carry Telemundo. It is my strong belief that in order for the digital transition to be successful, all multicast channels must be given must carry status.

Mike Lee

Vice President/General Manager
