

As a broadcaster in Oklahoma City I urge the commission to vote affirmatively on the multicast must carry. As we move to the digital age I see our station offering multiple streams of service to our community to include 24/7 weather information, local news and political coverage on a dedicated channel. Programming that could address the diverse population of Oklahoma, religious programming that in many cases has been squeezed out, and of course local highschool and college sports programming. With must carry we will be able to serve our community with the full range of services that local broadcasters were established to do. Thank you for your consideration.
