

Improvements to Amateur Radio Service:

- 1) Drop morse code requirements which will allow more HF operators.
- 2) Do not let the ARRL set the standards for RACES
Model nets and traffic handling after MARS.
- 3) Don't put too many course requirements on us (HAM) we have
lives other than training and we don't get paid for all the
time we spend training. Make one or two online classes (that
hams don't have to pay for) to cover all that is needed to be
part of RACES.

Thank You,

James C Flynn Jr.
