Re: NTT DoCoMo/Guam market entry – WT Docket 06-09

Dear Sir/Madame:

I am writing to express support on behalf of the Guam Visitors Bureau for NTT DoCoMo's pending acquisition of two existing wireless carriers on Guam: Guam Cellular and Guam Wireless.

As a National Tourism Organization, communications is an integral component of our trade and the telecommunications industry on Guam has evolved tremendously. Wireless products and services are important to island visitors, and we rely heavily on the Japan market, which makes up about 80 percent of our visitors. The referenced acquisition would certainly be a great benefit to our economy because it will facilitate customer convenience and help sustain the growth of our number one travel market and other international travelers to Guam.

We believe that the applicant's market entry will have a positive effect for Guam, and therefore urge your favorable approval.

Sincerely,

GERALD S.A. PEREZ
General Manager
