

Educational Broadcasting Foundation, Inc. ("EBF"), licensee of WLAE-TV, New Orleans, Louisiana, was issued Digital Television Broadcast Station Construction Permit File No. BPEDT-20000210AAF on August 14, 2000, as modified by Permit File No. BMPEDT-20050513AAI on May 31, 2005. EBF completed installation of its DTV transmitter related DTV facilities and the manufacturer, Axcera Corporation, performed a Proof of Performance on January 10, 2004. Thereafter EBF operated WLAE-DT under program test authority. EBF filed an FCC Form 302-DTV application for a license to cover its DTV construction permit on August 3, 2005 (FCC File No. BLEDT-20050803ACD.) All of EBF's DTV and NTSC facilities were destroyed as a result of Hurricane Katrina on and after August 29, 2005. EBF is making diligent efforts to return WLAE-DT and WLAE-TV on air at the earliest opportunity and is preparing a request to file for relief under 47 USC Section 312(g) to extend its license beyond August 29, 2006.
