

This proposed merger will effect competition, workers and consumers. I was always under the impression that there were laws on monopolies in this country but for some reason they seemed to be overlooked or neglected. This is one more step toward a monopoly and I am greatly against it. The FCC should consider the people such as myself that pay for cable and rely on the cable television for programming and news. This will cut competition and possibly cause higher prices. Many of us have a hard enough paying as it is. Please do not make it easier for Comcast and time/warner to block free speech, prices and competition. Judy McKinney
