

Several of the cable networks in our city's basic cable "bundle" have programming that is extremely offensive to my family's values and beliefs. We are faced with a hard choice of discontinuing all cable or paying for programming which is extremely objectionable. For example, a recent FX network show "Rescue Me" featured a rape scene in which the victim ended up enjoying the rape. That is a hugely destructive message to send to impressionable minds! I truly believe the a la carte programming would resolve this dilemma for our family. Please strongly consider requiring the cable companies to offer a la carte programming. It would be a blessing for our family especially. Thank you, Matthew Thornton
