**Re: Ex Parte Presentation
EB Docket No. 04-296**

Dear Ms. Dortch:

On August 31, 2006, Scott B. Tollefsen, General Counsel of USA Mobility, Inc., and the undersigned met with Commissioner Deborah Taylor Tate and her legal advisor, Aaron Goldberger, regarding the development of a new Emergency Alert System. Pursuant to Section 1.1206 of the Commission's rules, a copy of this letter, along with all of the materials distributed at the meetings, are being filed via ECFS with your office.

The purpose of the meeting was to provide information on USA Mobility's vital role in facilitating emergency communications and to underscore the distinctive attributes of paging services in connection with the development of a redundant, multi-platform alert system. We expressed support for the Commission's proposed expansion of the Emergency Alert System and discussed USA Mobility's ability to disseminate alert messages using its point-to-multipoint capabilities. We also discussed the exemplary performance and reliability of USA Mobility's text-messaging services during Hurricane Katrina and in the storm's aftermath, as recognized by the Independent Panel Reviewing the Impact of Hurricane Katrina on Communications Networks.

Moreover, we explained that, while USA Mobility is prepared to transmit alert messages to its subscriber base, a greater public benefit might result if other service providers were to

LATHAM & WATKINS^{LLP}

integrate paging technology into their own handsets, to promote increased redundancy and reliability.

Please contact the undersigned if you have any questions regarding this notice.

Sincerely,

/s/ Matthew A. Brill
