Subject: Concerns over Broadband over Power Lines

RECEIVED
AUG 3 0 2006
Federal Communications Commission
Office of the Secretary

Dear Chairman Kevin J. Martin,

Thank you for your time in reading this letter. I along with many other persons continue to have concerns over broadband over power line technology that utilizes frequencies below 30 Mhz. As you hear United Power Lines petition for declaratory ruling on August 3rd (WC Docket 06-10), please remember the many amateur radio enthusiasts around the country.

I do feel that it is a wonderful thing to provide broadband internet to all persons in our country, and BPL is a wonderful vehicle with which to do so. I am a very conscientious amateur radio operator and very thankful for the spectrum the FCC affords us. Just as I protect other users of radio airspace from harmful interference, I ask you now to please protect me from harmful interference as well.

I am new to amateur radio. I received my Technician's license in April of 2006. I upgraded to General 2 weeks ago. As a new licensee, one of my motivations for receiving my license was being a service to my community and my nation, especially in times of emergency. Please allow me to continue this service to my country without harmful interference.

Again, thank you for your support of the amateur service, the American Radio Relay League, and the spectrum protection that you continue to give us as amateur radio operators.

With Great Thanks and Respect,

Rev. John W. Hatton, M.Div., OTR
