

Dear FCC:

I am infuriated that the oral deaf/hard-of-hearing residents of Ohio do not have access to 2-Line CapTel service through the relay system.

The 2-Line CapTel system would make a difference in employment choices for hundreds (if not thousands) of Ohioans who have a hearing impairment.

How come we do not have 2-Line CapTel service in Ohio? The 1-Line CapTel service is not practical for employment purposes. The 2-Line CapTel system provides real-time close captioning services that is more practical for oral deaf/hard-of-hearing workers.

How long do we have to wait for 2-Line CapTel service to come to Ohio?

Thank your for your time with the above matter.

Sincerely,  
Someone who cares about people with disabilities.
