Office of Engineering and Technology declares)
Multispectral Solutions, Inc request for a waiver of) ET Docket No. 06-103
Part 15 to be a 'permit-but-disclose' proceeding)
for *ex parte* purposes (DA 06-1025))

Further Comments of the
National Radio Astronomy Observatory
Charlottesville, VA 22903

Comments of the National Radio Astronomy Observatory (NRAO) responding to the original waiver request by Multispectral Solutions, Inc. (MSSI) are already on the FCC record in Docket 06-103.

In the meanwhile, the nature and details of the waiver or waivers requested by MSSI are evolving and the scope of the request is substantially changing, even though the underlying technical and regulatory issues raised by NRAO remain to be addressed and resolved.

NRAO advises the Commission that it remains highly interested in the outcome of this matter, even if, as now, it refrains from providing further remarks on the merit of the MSSI waiver request.

Respectfully submitted,

National Radio Astronomy Observatory
