

Protect the First Amendment.
Protect the Free exchange of ideas.

This country is built upon freedom. Any action that the FCC takes to reduce freedom is ultimately an attack upon the foundations of our country.

The FCC should reduce regulations governing the ownership of the broadcast media. We have more choices now than ever before in broadcast media, we should not reign in Americans choices because a few radicals on the left are frustrated that their ideas are not winning the hearts and minds of this country.

If we move to censor the media now, where will it stop? Who will decide the final ownership or viewing options? Leave it to the free market and the great citizens of this country to choose what they want to watch.
