

Access Reductions by First Adopter States

October 25, 2006

[Since data varied by state or there was uncertainty, low and high amounts are shown. This is not to say that the high amount is not the appropriate amount to use. See notes.]

(Amounts in Millions)

State	Access Reduction Amount			Notes	
	Range->	Low	High		Average
Alaska		10.1	18.1	14.1	High range includes reductions for 2007
Arkansas		18.0	18.0	18.0	NARUC response not available, used state USF
Arizona		0.8	0.8	0.8	NARUC response not available, used state USF
California		468.0	468.0	468.0	NARUC response not available, used state USF
Colorado		0.1	0.1	0.1	NARUC response not available, used state USF
Idaho		2.0	2.0	2.0	NARUC response not available, used state USF
Illinois		8.6	8.6	8.6	NARUC response not available, used state USF
Indiana		115.0	115.0	115.0	Preliminary Estimate from Indiana Staff
Kansas		164.0	164.0	164.0	
Maine		72.9	72.9	72.9	Obtained from Maine Staff
Massachusetts		59.0	420.0	239.5	High range is estimated. Low range is only 2003
Nebraska		79.2	79.2	79.2	
Nevada		0.2	0.2	0.2	NARUC response not available, used state USF
New Jersey		25.0	25.0	25.0	
New York		308.8	580.0	444.4	Low is after 1995, high is from 1984.
North Carolina		-	-	-	Reductions made, amounts not quantified
Ohio		107.9	107.9	107.9	
Oregon		52.3	52.3	52.3	NARUC response not available, used state USF
Pennsylvania		34.0	34.0	34.0	NARUC response not available, used state USF
South Carolina		52.6	52.6	52.6	NARUC response not available, used state USF
Texas		540.2	540.2	540.2	NARUC response not available, used state USF
Utah		6.2	6.2	6.2	NARUC response not available, used state USF
Vermont		10.8	11.3	11.1	
Washington		70.0	70.0	70.0	NARUC response not available, used NRRI data
Wisconsin		196.1	260.5	228.3	High range includes future reductions.
Wyoming		4.1	4.1	4.1	NARUC response not available, used state USF
Total Access Reductions		2,405.9	3,111.0	2,758.4	

States Reporting That They Are Not Early Adopters

Minnesota	-
Washington D. C.	-

Observations:

Several states have not submitted data to NARUC yet, so the actual amount of access reductions may be substantially higher than the amounts shown.
