

It is my opinion, that the "public" at large should have more say in WHO has the right to broadcast to them. A Democratic Vote system in a way of a, Confidence Vote, would give people the power to control the airwaves by choosing or denying people the priviledge of Mass Communicating. Our present free-market approach has been a dismal failure leaving us with "lifers" without ay means of censure. This is the main situation in need of reform, we the people need to take back the airwaves. I havед designed such a way and stand ready to share it with you.
