R.Pritchard@IEEE.org

Dear Ms. Dortch:

Pursuant to Section 1.1206(b)(2) of the Commissions' Rules, this is to notify you that on October 10, 2006, Don Heirman, Chairman of ANSI Accredited Standards Committee C63, met with Julius Knapp and two of his staff and with Roshmi Doshi and William Hurst (via TV link to the FCC Labs) of the Office of Engineering and Technology regarding the above referenced proceeding.

During the discussion, I discussed ASC C63™'s reply comments on the Docket 06-155 which included a detailed review of the differences between our keystone measurement procedure ANSI C63.4 and that of Publication 22 of the International Electrotechnical Commission Special International Committee on Radio Interference (CISPR). Part of that discussion also reviewed the comments on the replacement of ANSI C63.4 with CISPR 22 as requested by the Information Technology Industry Council (ITIC) in their comments on the same Docket.

**Please Reply to:**

I pointed out that there are significant differences in the two test techniques that will lead to different compliance measurement results and that since the FCC already references ANSI C63.4 in its Rules in 47 CFR Section 15.31, it should not until reproducible data of the differences in results are provided change this reference to CISPR 22 as suggested by the ITIC comments.

Finally, since both standards have near equivalency in many parts, ASC C63™ is willing to work with ITIC which is a member of ASC C63™ to consider areas where further harmonization might be made between the two standards.

Pursuant to the Commission's Rules, one copy of this notice is being filed electronically with the Commission. If you require any additional information, please contact the undersigned at 732-741-7723.

Sincerely,

Donald N. Heirman, Chairman  
ANSI Accredited Standard Committee C63™
