VIA ELECTRONIC SUBMISSION

Ms. Marlene H. Dortch, Secretary
Federal Communications Commission
445 12th Street, S.W.
Washington, D.C. 20554

Re: Ex Parte Notice – WC Docket No. 04-36, 05-196

Dear Ms. Dortch:

Pursuant to Section 1.1206 of the Federal Communications Commission's ("Commission") Rules, this letter serves to provide notice in the above captioned proceedings of meetings that occurred on December 7, 2006 between representatives of Intrado Inc. ("Intrado"), and Fred Campbell, Legal Advisor, Wireless Issues to Chairman Martin, as well as Dana Schaffer, Deputy Chief, Public Safety and Homeland Security Bureau. In attendance on behalf of Intrado were Susan McGurkin, Director of Federal Affairs, and the undersigned.

In these meetings, Intrado discussed its previously filed document addressing future policy considerations and recommendations for Automatic Location Service requirements and conditions applicable to all telecommunications service providers. Intrado emphasized that its recommendations are founded in the fact that the level of accuracy needed to precisely locate a caller in distress must make it possible for a first responder to swiftly find the caller and render emergency assistance. Along with this belief, Intrado expressed that fundamental public safety requirements must form the basis for future Automatic Location Services rules, no matter what communications device or technology is being utilized. Finally, Intrado discussed how the industry should work together collaboratively to define a phased approach to reach these goals and encouraged the Commission to engage all stakeholders for the effective development of future E9-1-1 auto location rules.

Please contact the undersigned with any questions.

Very truly yours,

/s/

Mary A. Boyd
Vice President, Government & External Affairs
