

I fully support the ARRL's "Petition for Reconsideration" and the "Petition for Partial Stay of Effective Date of Rule." I believe that the FCC went too far in authorizing phone privileges down to 3.600Mhz. I believe the ARRL's proposal in the petition is more sensible. CW and the many digital modes should be allowed 3.500 - 3.635. This will protect the Emergency Communication Nets and the CW and Digital operators. I urge the FCC to fully implement the ARRL's petitions immediately.
