

In only the last 6 years, it has become blatantly obvious how media conglomerates have altered and spun stories to protect big business and are still discriminating against the ideology of our fundamental right - Freedom.

Janet Jackson should have been convicted for her actions, and it is purely an abuse of power to restrict the rights of the mass public for the actions of one person. Personally, I have discredited anything that is reported on a Clear Channel network, realizing that the content they broadcast is strictly propaganda for political and corporate benefit. I have turned to other broadcast companies to provide objective information.

Global warming is another example of how Clear Channel misrepresents the truth. Both the EPA & NOAA agree that Global Warming is caused by man's use of fossil fuels, yet Howard Shapiro on Fox in Tampa reported that it is a natural cyclic event- just three weeks ago! How can a broadcast network present an opinion as if it was information when it disagrees with our government's own scientific community? This is more devastating to America's future generations than an exposed breast during the super-bowl.

Allowing big media companies to control more information moves our political alliance closer to totalitarianism. The FCC has a responsibility to maintain political neutrality by ensuring that many different voices have equal access to the broadcasting spectrum. Please do your best to protect America's future.
