# Changes in Use Case

With fixed technologies moving to fill the mobile use case and the mobile technologies moving to fill the fixed use case, the overall usefulness of location information provided to a first responder has continued to be degraded since the introduction of cellular.

## ➤ Indoor Use Case

- When an Emergency Caller is at a fixed address, the most useful location information to a First Responder is that Address.

## ➤ Outdoor Use Case

- When an Emergency Caller is in a mobile environment, the most useful location information is a X/Y/Z or a point of reference
