

If the FCC changes its aviation obstruction lighting to require just flashing lights, many birds lives will be saved and bird mortality at towers will drastically decline or be alleviated. This effects my life and the human life environment in so many ways. Turning the other cheek to known causes of senseless death on any living thing is a horrible act. We share this world with nature and it is our duty to protect it and to live side by side in as much harmony as possible. Please protect our avian fauna. Please help prevent this enourmous killing of millions of birds annually. Thank you for your time, Jeannette J. Carillo
