Re: WT Docket No. 03-187, FCC 06-164

Dear Sirs:

I wish to submit my comments for the public record concerning the Notice of Proposed Rulemaking proposed by the FCC concerning changes in construction of communication towers.

I am very much in favor of the proposed changes. Any changes which can be instituted which will decrease deaths of migratory birds and bats without affecting the efficiency of the towers should be required as soon as possible. Communication towers have been shown to be a major factor in the decline of bird populations in this country. Future siting of towers should be done so as to avoid major migration routes and the towers designed to minimize deaths to migrating birds as much as possible, to help protect our wildlife.

Please enter my comments into the public record. Thank you.

Yours truly,

A handwritten signature in cursive script that reads "A. Stephen Johnson".
