Re: Former Nextel Communications, Inc. Upper 700 MHz Guard Band Licenses and Revisions to Part 27 of the Commission's Rules, WT Docket No. 06-169; The Development of Operational Technical and Spectrum Requirements for Meeting Federal, State and Local Public Safety Communication Requirements Through the Year 2010, WT Docket No. 96-86.

Dear Ms. Dortch:

On 25 January 2007, Ken Budka and I, on behalf of Alcatel-Lucent, participated in separate meetings with John Branscome, Acting Legal Advisor for Commissioner Michael J. Copps, Barry Ohlson, Legal Advisor for Commissioner Jonathan S. Adelstein, and Timothy A. Peterson, William D. Lane and Jeffrey S. Cohen, Public Safety and Homeland Security Bureau. The purpose of the meetings was to discuss, reiterate and affirm Lucent's position in the above referenced proceedings.

Alcatel-Lucent continues to support the need for a broadband-only 6 MHz broadband block in the 700 MHz public safety spectrum space. In addition, we believe that there is broad consensus among commenters in the Guard Band proceeding that the benefits of a 6+6 band plan greatly outweigh the costs associated with reprogramming existing radio equipment. Finally, the Federal Communications Commission should specify 1.25 MHz as a basic broadband channel size and allow for aggregation of multiple 1.25 MHz broadband channels in the 12 MHz of space currently set aside for public safety. Further substance of the discussion is set forth in the attached handout.

In accordance with Section 1.1206(b)(2) of the Commission's rules, this letter is being filed electronically with your office. Please contact the undersigned with any questions in connection with this filing.

Respectfully submitted,

Michael T. McMenam
