Washington, D.C. 20554

In the Matter of:)
)
Advanced Television Services and) MB Docket No. 87-268
Their Impact upon the Existing)
Television Broadcast Service)

Directed to: The Commission

COMMENTS

La Cadena Del Milagro, Inc., licensee of WWSN(TV) and permittee of WWSN-DT, Facility ID No. 67190, Humacao, Puerto Rico, by its attorneys, hereby respectfully submits its Comments in response to the Commission's *Seventh Further Notice of Proposed Rule Making*, FCC 06-150, released October 20, 2006 ("*SFNPRM*"). With respect thereto, the following is stated:

La Cadena is licensed to operate on analog Channel 68 (BLCT-20060829BHG), and holds a construction permit for operation on DTV channel 49 (BMPCDT-20060719ACQ). The proposed Digital Television ("DTV") Table of Allotments attached to the *SFNPRM* specifies these channels and the technical parameters authorized by the initial DTV allotment for WWSN-DT. La Cadena hereby submits its Comments to request that the listed technical parameters be updated to reflect WWSN-DT's modified construction permit.

As La Cadena prepared to construct the authorized DTV facilities, and after conferring with its consulting engineer, it was determined that the then-current tower for both La Cadena's analog and digital facilities was corroded beyond repair. As such, La Cadena determined that it would be necessary for WWSN to move to an adjacent tower.

It filed a minor modification for its analog facility (BPCT-2003815ACW), and received special temporary authority to operate a low-power digital facility from the new transmitter site (BDSTA-20021016ABI). Subsequently, an application for modification of the digital construction permit was filed. That application specifies the adjacent transmitter site and slightly different technical facilities.

As demonstrated by the grant of the modification application, the facilities are equivalent to those specified in the initial WWSN-DT construction permit. The modification application was granted on December 13, 2006, after the release of the *SFNPRM*. A copy of the construction permit is attached hereto as Exhibit A. Subsequent to the grant of the modification application and release of the *SFNPRM*, La Cadena has received an analog license to operate from the new transmitter site (BLCT-20060829BHG).

Thus, it is hereby requested that the technical specifications set forth in the proposed DTV Table of Allotments be corrected to reflect the updated technical parameters set forth in the attached construction permit. Since the signal coverage contours of the modified facilities approved by the Commission are equivalent to the previously authorized signal contours, this correction will have no impact on other proposed allotments.

Rather, the result will be only to update the Commission's records to reflect the recently-authorized technical parameters for WWSN-DT. The substantial benefits associated with accurate Commission records support making the update, and the fact that the current facilities are equivalent to those previously specified will ensure that the update will not require any other changes in the Table of Allotments.

WHEREFORE, the premises considered, La Cadena Del Milagro, Inc., hereby respectfully requests that the proposed DTV Table of Allotments be corrected to specify the technical facilities for WWSN-DT as set forth in the attached construction permit.

Respectfully submitted,

LA CADENA DEL MILAGRO, INC.
