Re: M2Z Networks, Inc.
Application for License and Authority to Provide National Broadband Radio Service in the 2155-2175 MHz Band; Petition for Forbearance under 47 U.S.C. § 160(c) to Permit Acceptance and Grant of Its Application
WT Docket Nos. 07-16 and 07-30

Dear Ms. Dortch:

On December 18, 2006, County Commissioner Herb Greene of Caldwell County, North Carolina sent a letter to Chairman Kevin J. Martin supporting M2Z Networks, Inc.'s ("M2Z") Application for License and Authority to Provide National Broadband Radio Service in the 2155-2175 MHz Band (the "Application"). Commissioner Greene's letter was subsequently included in the record of the above-referenced proceedings.

Commissioner Greene's letter explains that a study from the Appalachian Regional Development Institute found that only 62.8% of businesses in North Carolina are connected to the Internet, and of those, urban firms are more likely than rural firms to be connected (67.5% urban compared with 57.8% rural). In addition, the study found that rural firms are much more likely to use slower dial up connections than urban firms (52.4% of rural firms use dial up connections versus 40.2% of urban firms). These statistics show that businesses based in rural areas continue to lag behind their urban counterparts in terms of Internet access. M2Z's entry into the broadband market will provide an affordable service alternative to assist rural firms in obtaining improved access to the Internet. This result is consistent with the Commission's public interest mandate.

Accordingly, in the interests of establishing a more complete record in this proceeding and aiding the Commission in evaluating the public interest benefits of granting M2Z's Application, either directly or under the Commission's forbearance authority, the following study referenced in Commissioner Greene's letter is submitted herewith:
