

While I am a member of the American Radio Relay League (ARRL) and I do support MOST of their agenda items, RM-11306 is NOT one of the ones I support.

I strongly oppose the use of wideband data applications and/or automatic stations not only in the amateur voice bands, but in the CW/RTTY and data subbands unless segregated from more popular modes.

I am a recent convert to the amateur digital modes, specifically PSK-31, and to permit the use of these wideband applications and automatic stations would render the narrow modes useless due to harmful interference. This is unacceptable and this proceeding must be denied/defeated.
