

Why does the ARRL get to submit comments/changes to RM-11306 after all deadlines for comments are over? (See http://svartifoss2.fcc.gov/prod/ecfs/retrieve.cgi?native_or_pdf=pdf&id_document=6518726280) Seems to me that this is highly irregular and the ARRL proposal SUBSTANTIALLY changes the original proceedings. Perhaps the original should be scrapped and the process should start over.

Regards,
Michael Harnage W1MT
