

comment to the ex-parte revision of RM-11306

Sir: I have held my ham ticket since 1962 and have operated all modes during that time and have first hand knowledge of robot station operations. I am opposed to any changes in part 97.221 that allows automatically controled digital stations to operate outside of the current subbands. As a ARRL member I oppose their changes to part 97.221 and RM-11306. Allowing the changes that the arrl is trying to do in not for the best interest of our hobby or its membership. thank you Anthony W. DePrato
