	<b>TOTAL</b>	<b>221 of 522, or 42%, of listed communities qualify as rural**</b>		
<p>* Population and square mileage data used in this exhibit were obtained from the 2005 Claritas Demographic Update, a source of up-to-date market research analysis and target marketing research about the population, consumer behavior, consumer spending, households and businesses in the United States. Claritas uses census data trends to make annual predictions about demographic information. More information about the Claritas data is available at: <a href="http://www.tetrad.com/demographics/usa/claritas">http://www.tetrad.com/demographics/usa/claritas</a>.</p>				
<p>**The Commission defines "rural" areas as counties in which there is a population density of one hundred people or less per square mile. See <i>Facilitating the Provision of Spectrum-Based Services to Rural Areas and Promoting Opportunities for Rural Telephone Companies To Provide Spectrum-Based Services</i>, 19 FCC Rcd. 19078 (2004). Although Open Range states that it will serve 553 communities, only 522 communities are identified in the Open Range Proposal at Annex A. The communities shaded in gray fail to meet the definition of "rural" used by the FCC.</p>
